

Practice item 7

Please enter your full name: Diya Jain

Please select the practice item: 7

Please convert -19 to signed decimal to 8-bit binary representation with sign-magnitude : 10010011

Exellent!

Continue? (y/n): y

Please convert 27 to signed decimal to 8-bit binary representation with sign-magnitude : 00011011

Exellent!

Continue? (y/n): y

Please convert -33 to signed decimal to 8-bit binary representation with sign-magnitude : 10100001

Exellent!

Continue? (y/n): y

Please convert 106 to signed decimal to 8-bit binary representation with sign-magnitude : 01101010

Exellent!

Continue? (y/n): y

Please convert 13 to signed decimal to 8-bit binary representation with sign-magnitude : 00001101

Exellent!

Continue? (y/n): y

Please convert 92 to signed decimal to 8-bit binary representation with sign-magnitude : 01011100

Exellent!

Continue? (y/n): n

Name: Diya Jain

You have completed 6 conversions of signed decimal integers to binary with sign magnitude.

You have done 6 correctly.

Practice item 8

Please enter your full name: Diya Jain

Please select the practice item: 8

Please convert -39 to signed decimal to 8-bit binary representation with 1's complement: 11011000

Exellent!

Continue? (y/n): y

Please convert -11 to signed decimal to 8-bit binary representation with 1's complement: 11110100

Exellent!

Continue? (y/n): y

Please convert 63 to signed decimal to 8-bit binary representation with 1's complement: 00111111

Exellent!

Continue? (y/n): y

Please convert -14 to signed decimal to 8-bit binary representation with 1's complement: 11110001

Exellent!

Continue? (y/n): y

Please convert -11 to signed decimal to 8-bit binary representation with 1's complement: 11110100

Exellent!

Continue? (y/n): n

Name: Diya Jain

You have completed 5 conversions of signed decimal integers to binary with 1's complement.

You have done 5 correctly.

Practice item 9

```
Please select the practice item: 9
Please convert -121 to signed decimal to 8-bit binary representation with 2's complement: 10000111
    Exellent!
Continue? (y/n): y

Please convert 103 to signed decimal to 8-bit binary representation with 2's complement: 01100111
    Exellent!
Continue? (y/n): y

Please convert -75 to signed decimal to 8-bit binary representation with 2's complement: 10110101
    Exellent!
Continue? (y/n): y

Please convert 100 to signed decimal to 8-bit binary representation with 2's complement: 01100100
    Exellent!
Continue? (y/n): y

Please convert -44 to signed decimal to 8-bit binary representation with 2's complement: 11010100
    Exellent!
Continue? (y/n): y

Please convert -62 to signed decimal to 8-bit binary representation with 2's complement: 11000010
    Exellent!
Continue? (y/n): n

Name: Diya Jain
You have completed 6 conversions of signed decimal integers to binary with 2's complement.
You have done 6 correctly.
```

Practice item 10

Please select the practice item: 10

Please convert signed binary pattern 11001100 of sign-magnitude to decimal representation: -76

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 00100001 of sign-magnitude to decimal representation: 33

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 10110111 of sign-magnitude to decimal representation: -55

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 11110100 of sign-magnitude to decimal representation: -116

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 01010100 of sign-magnitude to decimal representation: 84

Exellent!

Continue? (y/n): n

Name: Diya Jain

You have completed 5 conversions of signed binary of sign-magnitude to decimal.

You have done 5 correctly.

Practice item 11

Please enter your full name: Diya Jain

Please select the practice item: 11

Please convert signed binary pattern 00010011 of 1's complement to decimal representation: 19

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 10100011 of 1's complement to decimal representation: -92

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 10110100 of 1's complement to decimal representation: -75

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 01011110 of 1's complement to decimal representation: 94

Exellent!

Continue? (y/n): y

Please convert signed binary pattern 11101011 of 1's complement to decimal representation: -20

Exellent!

Continue? (y/n): n

Name: Diya Jain

You have completed 5 conversions of signed binary of 1's complement to decimal.

You have done 5 correctly.

Practice item 12

Please select the practice item: 12

Please convert signed binary pattern 10110110 of 2's complement to decimal representation: -74

Excellent!

Continue? (y/n): y

Please convert signed binary pattern 00101110 of 2's complement to decimal representation: 46

Excellent!

Continue? (y/n): y

Please convert signed binary pattern 10010111 of 2's complement to decimal representation: -105

Excellent!

Continue? (y/n): y

Please convert signed binary pattern 00101011 of 2's complement to decimal representation: 43

Excellent!

Continue? (y/n): y

Please convert signed binary pattern 11111110 of 2's complement to decimal representation: -2

Excellent!

Continue? (y/n): y

Please convert signed binary pattern 10100000 of 2's complement to decimal representation: -96

Excellent!

Continue? (y/n): n

Name: Diya Jain

You have completed 6 conversions of signed binary of 2's complement to decimal.

You have done 6 correctly.
